Lab #8
Debugging
Due in Lab, November 19, 2003

Name: _____

Lab Time: _____

Grade: _____/10

Using GDB, the Gnu Debugger

Today in lab, you will be performing a tutorial for GDB. This tutorial as well as a link to GDB online documentation can be found in the reference materials section of the class web page. The source file, `bug.C`, that you will debug in the tutorial is in the directory `~csci3308/src`.

What to Hand-In

For this lab, turn in a printout of the modified bug.C program that has all three of the bugs fixed. (We need some record that you completed the tutorial.) Make sure your name, your lab partner's name, and your lab section is listed on the printout.
