

Open Hypermedia

Object-Oriented Analysis and Design
CSCI 6448 - Fall 1998
Kenneth M. Anderson

Open Hypermedia is...

- External relationship management
 - Anchors and Links stored separate from application content
- Support for hypermedia in all applications between all applications
 - Not just Web browsers, help systems, etc.
 - Which are typically monolithic or hardwired to work with only a specific set of applications

CSCI 6448
Kenneth M. Anderson

Open Hypermedia Systems (OHSs)

- MicroCosm, MultiCosm, WebCosm
 - Southampton University
- Devise Hypermedia (DHM)
 - Århus University, Denmark
- Hyperform, HyperDISCO
 - Aalborg University Esbjerg

CSCI 6448
Kenneth M. Anderson

Open Hypermedia Systems

- SPx/HBx, HOSS
 - Texas A&M
- Sepia, Dolphin
 - GMD/IPSE in Darmstadt
- Sun Link Service
 - Sun Microsystems (First link server, 1989)
- And...

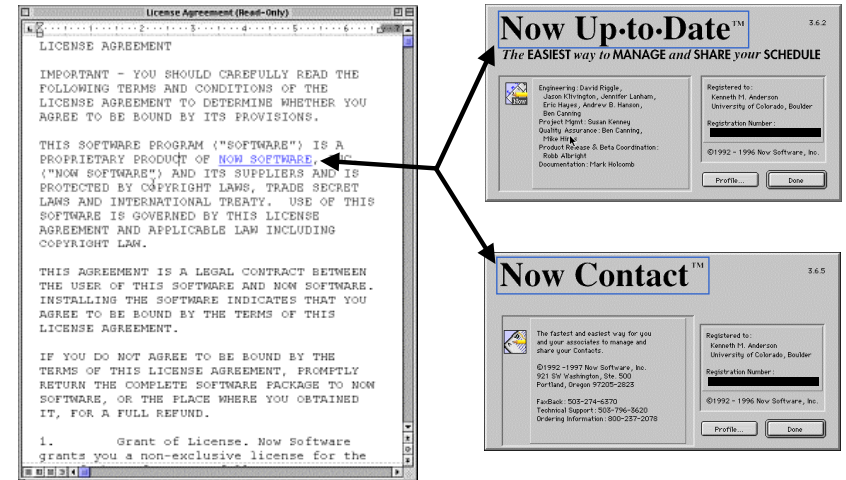

CSCI 6448
Kenneth M. Anderson

Chimera & Chimera 2

- University of California, Irvine
 - Ken Anderson (me)
 - Richard N. Taylor (my advisor),
 - Jim Whitehead (WebDAV lead)
- Now at University of Colorado, Boulder
- Will be used as an example throughout this class

CSCI 6448
Kenneth M. Anderson

Basic Idea

CSCI 6448
Kenneth M. Anderson

Chimera OHS

- Open Hypermedia support for Software Engineering
- Applies multiple techniques to support heterogeneity
 - Information, processes, people, platforms
- Applies multiple integration techniques to provide services to wide range of clients

CSCI 6448
Kenneth M. Anderson

Chimera Clients

- FrameMaker
- XEmacs
- Netscape
- JPEG and GIF Viewer
- MPEG Viewer (needs to be upgraded)
- Sound Player
- B-2 Bomber Flight Simulator (!)

CSCI 6448
Kenneth M. Anderson

Chimera APIs

- Application Program Interface
 - The services provided by Chimera
 - Chimera 1
 - Ada, C, and Java
 - Chimera 2
 - C and Java
 - In the future,
 - HTTP/XML, Ada, C++

CSCI 6448
Kenneth M. Anderson

Chimera Concepts

- Viewers
 - Applications that display/edit information
- Objects
 - Information for a particular viewer
- Views
 - The representation of the object by the viewer to a user (user does not have to be human)

CSCI 6448
Kenneth M. Anderson

Chimera Concepts, continued

- Anchors
 - A specific region of interest within a view
 - Note: views act as an anchor for the entire view
 - Can be view-independent (anchor appears in all views of an object)
- Links
 - Sets of anchors (& views)

CSCI 6448
Kenneth M. Anderson

Chimera concepts, continued

- Attribute-Value Pairs
 - All previous concepts can have attributes associated with them
- Hyperwebs
 - A set of Anchors and Links
 - Can contain hyperwebs
 - Inherit anchors / links from parents
 - Views, Objects, Views stored separate

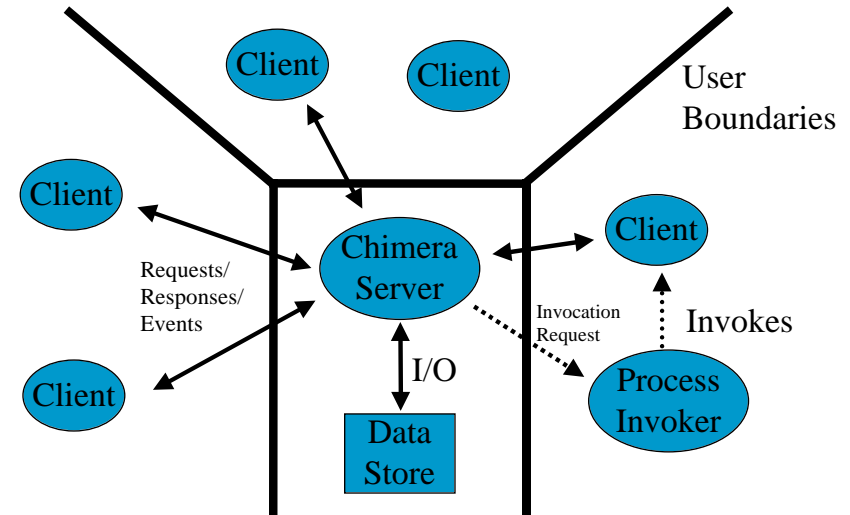

CSCI 6448
Kenneth M. Anderson

Return to Chimera API

- API contains operations to manipulate concepts
 - i.e., Create_Viewer, Add_Anchor_To_Link
- It also contains operations to register interest in events as well as event handlers
 - i.e., Handle_Link_Traversal

Supporting Applets...

5. Applet Server then functions like Chimera Server on previous slide.
