

Rally and Web 2.0

Overview

- About Me
- About Rally
- Rally ALM
- Web Services
- The Future
- Conclusion

About Me

- BS CS from CU, Graduated May 2003
- Started at Rally in September 2003
- Dev Manager

About Rally

- Tools, Services & Support for Agile Success
- Rally ALM (Application Lifecycle Management) tool enables agile teams to plan, track progress, and manage tests and defects.
- Comprehensive training and consulting delivered by Rally's in-house Agile coaches
- Diverse public training courses provided in Agile University
- Best practices from the Agile community through Agile Commons

Rally ALM

- Core Rally product
- 5 years in the making
- SaaS (Software as a Service)
- Java
- Started as Web 1.0 – portal
- Revamped to use AJAX, JavaScript – why?
- Innovative user experience
 - drag/drop
 - widgets
 - rich text

Web Services

- Why? Give customers programmatic access to their data.
- Supporting REST and SOAP
- Top level domain objects exposed as resources
- CRUD
- Queries
- Integrations
- Mashups

The Future

- Rally Platform
 - Encompasses web services, JavaScript toolkit, and UI library
 - Lower the bar for implementing mashups
 - Run mashups seamlessly in and out of Rally
 - Enhancements to web services to increase performance
- Rally ALM
 - Leveraging the platform with better performance and usability

Conclusion

- Questions?
